Environmental Justice

May 9-11 was Pittsburg's first Environmental Justice Summit with the theme Reflective, Connected, Coordinated, Collaborative Action. Attendees included Pitt health, education, and environmental leaders, as well as community members, academics, activists, and other advocates.

The event celebrated the good work that's being done to advance environmental justice in our region. It also brought together different groups to meet, network, engage in panel discussions, and participate in a collaborative way forward.

The summit goal was to kick off a collective effort under a shared vision to eliminate our current disparities in health and provide opportunities for our communities to thrive. The model being used is the "one health" approach:

- Use innovation to inspire communities to develop a healthier environment
- Use innovation to inspire communities to develop a healthier environment
- Use innovation to inspire communities to develop a healthier environment
- Use innovation to inspire communities to develop a healthier environment
- Use innovation to inspire communities to develop a healthier environment
- Use innovation to inspire communities to develop a healthier environment
- Use innovation to inspire communities to develop a healthier environment
- Use innovation to inspire communities to develop a healthier environment
- Use innovation to inspire communities to develop a healthier environment

On Friday in the Hill District, keynote speaker Dr. Sacia Wil- derson, Maryland's College Park health department director, presented a lively discussion about current initiatives to reduce asthma in housing, education, and healthcare. Participants heard from activists and community members about the impact of environmental injustice and the actions they are taking to fight it.

On Saturday, an event in the Hill District was held to celebrate the first Environmental Justice Summit. The event celebrated the work that is being done to advance environmental justice in our region and brought together different groups to meet, network, engage in panel discussions, and participate in a collaborative way forward.
